

## What is Space Explorers, Inc.?

Space Explorers, Inc. is a space education corporation committed to bringing the excitement of space exploration into classrooms worldwide. We strive to improve students' skills in math, science, and technology in the hopes of inspiring a new generation of explorers to pursue further studies and careers in these fields.

## How many customers has Space Explorers served?

Space Explorers has worked with more than 10,000 teachers in rural and urban schools in all 50 states and more than 20 foreign countries. Our customer base includes public and private schools, homeschool students, gifted and talented programs, extracurricular organizations, and more.

## What will I receive with a subscription to Space Explorers programs?

Space Explorers provides interactive educational materials that include standards-based curriculum, hands-on activities, simulations of actual NASA missions, interactive applets, plant experiments replicating those conducted aboard the International Space Station, and much more. To enhance these programs, Space Explorers offers additional items on its website, including message boards; student activities such as polls, contests, or at-home activities; a space news and professional development newsletter; regular online chats with scientists, astronauts, and other industry professionals; and much more.

## What does it cost to participate in Space Explorers programs?

These programs are reasonably priced so teachers may help their students experience the wonder of space without draining their already tight budgets. Contact a product specialist at 800-965-3763 to learn more about grant opportunities.
